

# Environmental Policy

This document is the Environmental Policy for Method Safety and Security Ltd and group companies (=Method).

The training, consultancy and services delivered by =Method relate to the safety and security of our clients and their sites. As such, the most significant impact that =Method can have on protecting the environment relates to the quality of the work that we deliver. If our clients are safe and secure, that will normally be achieved by ensuring the integrity of their assets, which will then reduce and eliminate the loss of containment events that would adversely impact the environment.

It follows that ensuring that our work is of the highest quality and in line with relevant good practice – as embodied in our Q100 Quality Policy – is the major contributor to our positive impact on the environment.

In our day-to-day operations, we will also seek to reduce and eliminate any negative impact on the environment, by actions not limited to those below.

=Method will;

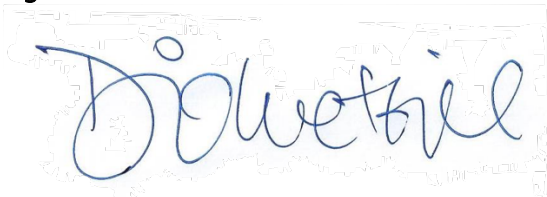

- Support and encourage home working and use of video conferencing
- Support and encourage use of public transport
- Provide employees with the facility to take part in the “Cycle to Work” scheme
- Reduce and recycle all possible materials

This Policy is established by the Management Team and signed off by the Chief Executive Officer. It is reviewed annually as part of the Q102 Business Risk Review.

Our Quality Management System is the process by which we implement the above objectives, guidance for which is provided in our Q101 Quality Manual.

All individuals who work on behalf of =Method are expected to support the values expressed in this Policy.

**Signed on behalf of =Method**

Dil Wetherill – Chief Executive Officer  
Method Safety & Security Ltd
